

Invited by Austin High School (Houston ISD) 's Consoler Ms. Victoria Salinas, Lisa Li and Vincent Parra of SPE GC community service have successfully made an Energy4me presentation following a discussion as a part of the summer scholar program June 22. It helped students gaining invaluable knowledge about the oil and gas industry. SPE's Energy4me program serves a vital role in preparing young students for their future and helps the students to make connection points from what they are learning at their high schools to what will be needed for the energy industry.
