

SPE Gulf Coast Section – Diversity & Inclusion Committee

Vision and Mission Statement

The vision of the society of petroleum engineers gulf coast section diversity and inclusion committee is to build an inclusive community that values diversity in talent, experiences, background, and contributions to inspire, engage and motivate members to reach their highest potential. Our mission is to create awareness by providing resources to facilitate discussion and education on diversity and inclusion principles for engagement in professional relationships.

Agenda

The SPE GCS D&I committee is organizing multiple events throughout the year including webinars, in-person as well as hybrid events, community outreach events and its inaugural D&I symposium in 2022. These events serve as a forum to encourage diversity and inclusion, while highlighting its value to the oil & gas industry. The events are led by D&I experts and industry champions discussing best practices and strategies for advancing diversity and inclusion, including sharing resources to increase cultural awareness, how to engage individuals from minority backgrounds, and the benefits of a diverse workforce.

Join us in supporting this global initiative - our diversity is our strength!

Benefits of Sponsorship

Sponsorship of the SPE-GCS D&I efforts and events positions your company as a *Diversity and Inclusion* leader and champion in the oil & gas community. Sponsorship opportunities include advertising your company logo on the SPE-GCS website and SPE-GCS Connect monthly newsletter, posting banners and promotional materials at group events, and promoting the group's activities in general, all at an affordable cost. These events are also a great opportunity for learning and networking for your staff.

Society of Petroleum Engineers (SPE) is a non-profit professional association. SPE Gulf Coast Section (GCS) is the largest SPE's section worldwide. Your sponsorship funds go towards supporting GCS technical and community outreach events as well as our scholarship program which supports high performing students in the Gulf Coast region during their college years and aim to encourage and increase interest in the petroleum industry including among minority students.

All these are only possible thanks to the kind financial support from companies like yours; and we would like to thank you in advance for your participation and support.
